

question answer

I don't know what grooming tools I need for my dog. Does this book explain all the grooming tools I need? Hello. It is very difficult to say \all grooming tools what I need\". In this book you can find the most popular dogs and the correct handling of the grooming styles and tools. my proposal is following. you should look which Kind of dog you want to groom and after check the index of the book."

Is the bouvier des flandres included? Yes it is, in the herding group. The book has much more than just the cuts, it has all the basics a beginner would need to know, all the tools needed and what they are for and how to use them, how to cut nails, sanitary trims, trim paw pads plus so much more. The book has details on how to trim all the different breeds in each group. I'm sure you would find it useful no matter how experienced a groomer you are.

Does it specifically cover how to keep male genitalia clean and trimmed? Not that I have seen in it.

Does it cover anything on cats? No

I am having trouble grooming my Irish terrier's face, specifically the muzzle. Are there instructions on grooming the Irish Terriers face? There is a section on Irish terriers in the book, I just groomed one today and had to use the book!

Does it cover hand stripping a welsh terrier? Yes, it has a section towards the front of the book that covers \Carding and Hand-stripping\". In the \"Terrier Group she describes how to do everything else in the groom. She also has a section on bathing and drying your dog. This book covers all the \"groups\" and how to groom them. I'd give it 5 stars."

Is the Irish Terrier included in this book? Yes the Irish terrier is in the book!

Is the Havanese in the book? Yes!

Anything specific to Coton de Tulear breed, and teddy bear and or puppy cuts? The Coton is not in the book, however, the treatment on their coat is much like any other drop-coated breed, if the Coton is getting a pet style trim. There are directions for a teddy bear style head and puppy style trims for mixed breeds under the drop coat styles chapter. Hope this helps.. goldendoodle A Goldenoodle is a dog that is a cross of a Golden Retriever and a Poodle (Standard).

Where is this made? Made in USA Distributed by: Sergeant's Pet Care Products, Inc. Omaha, NE 68130 www.sentrypetcare.com

Does this have an expiration date? Does it only last a limited amount of time? yes it does have an expiration date. However, it is usually a couple of years out from the purchase date, so if you use it daily or even every other day you will use it up way before it expires. hope this helps.

does this have any type of sugar, grane alchol or sugar substitute? what makes it great? Here is the list of ingredients: Sorbitol, hydrated silica, glycerin, water, natural peanut flavor, xanthan gum, acidified calcium sulfate, mushroom extract, benzoic acid, chlorophyll, eucalyptus oil, parsley seed oil. Our dogs like the taste so can brush their teeth longer with this toothpaste. Feel better that this toothpaste has more natural ingredients than other brands/type that have

tried. Have been brushing their teeth once almost every night with human soft toothbrush. Their teeth looks white and clean. (Hope this helps.)

Does this contain citric acid? it is not listed as an ingredient.

IS this product VEGAN, specifically the glycerin? It is my understanding that this product is not vegan. But I'm not 100% sure.

does anyone know where this is made? Believe it or not.... the USA!

is this a paste or a gel? It's a gel.

What is the total seed capacity? The first bullet reads 6 in the barn and 1 in the silo, but the 4th bullet states a 12-lb. capacity. The barn holds about 4 times the silo. However they are both so hard to fill that I threw both feeders away. Plus the silo bird perches don't stay in and the seeds flow out. I super glued them and they still came out. I don't recommend these. Check Big Lots \$12 feeders. Holds 3 times and is super easy to fill.

What are the dimensions? 11.5 inch x 9 inch x 12.75 inch. Silo includes both thistle and standard seed ports

I have a pole to mount it. Does it come with the mount-piece already attached to the bottom of the feeder? No. I hung my feeder but I seem to remember it had a pole mount. I might add that the little red roof opening where you load the seeds into is very small and partially blocked inside by support structures. I had to cut out two of the four structures to allow seeds to flow in. It is a big feeder and holds a lot of feed.

What are the dimensions? used for our pet food storage in the laundry room. My measurements are 14 3/4 inches high X 15 inches deep and 12 inches wide.

Is it airtight? Not air tight, but it clicks closed. There is not a rubber gasket or other material around the closure- it is hard plastic on hard plastic. I had one bag of moth-infested dog food in one container and it didn't spread to the second container, which gives me confidence in the quality of the product.

Are they rain proof? Light rain- but rain could get in around door- and bugs , as there is no gusset around the door, just plastic on plastic. i keep in laundry room and no bugs or rain!

I have 2 of the 18 gal size and I want to get a 24 gal size. Will the different sizes stack together or will they be wobbly? I've got smaller ones and they're wobbly and stacking one on top of the other sucks and I'm not doing it - they'll just slowly collapse. What I've done that has taken care of the problem is just put a board on top of the two bottom containers and then stack another on top of the board - we have three total so that has worked for us. The second row weight distributes via that board across the entire bottom two storage units instead of just the four points that then get squished over time and begin to collapse. The board has prevented any collapse - no worriess. I put the heavier content ones on the bottom and the lighter on top but there isn't that much difference really. So a board works. I'd stick another container on top and be comfortable with that. Now I would never stack over two rows with my board solution though. What I would do is still purchase these containers because they are pretty cool for what we need them to do, and I would purchase some concrete building blocks (pretty cheap although somewhat heavy). Then I would put one concrete block on top of another and once I got above the height of the first row storage then place a board on the concrete blocks. Then do the same on top of that second row I just made to get to a third row. That way all weight from any of the two upper rows of storage boxes is transferred to the board and the concrete blocks and the first row is on the ground so no problems. Hope that helps. =P

Roughly, how many lbs of feed does this hold? Depends on how the dog food is sized; something in big chunks will weigh less than something that is tiny. Also, the content of dog foods will slightly alter the weight. I buy 30# bags of a senior dog mix and store it in two of the Bergan Stack-N-Stor 40's. I don't know what the 40 stands for -- my guess at the time I bought them was that it stood for an internal capacity of 40 cubic inches. I hope this has been a helpful answer and doesn't sound too pedantic.

Can you please tell me for each gallon size how many pounds of dog food they approximately hold? Hello, yes .. They are approximately 15.25"x15"x12.25 (this is the small one you are looking at) so depending on the kind of dog food just picture the size... Different types of food has different weight. In general terms, this size container can hold about 5-7 lbs, maybe more." What is the height of two stacked? It looks like one would fit into the other & make it shorter than height x2. I'm hoping to fit into a cabinet. Hi, I measured and two stacked are right at 27 inches.

Are these containers BPA free? Sorry I don't know!

does this product come with 2 containers No, only one container. I think they are demonstrating the "stackability" of the product in the picture."

Last time I got this 3 capsules had 1 mg Manganese, or 1/3 mg per cap. Ingredient panel here says 1 capsule has TEN mg? That's too much to take! The most recent container I have which is only a few months old clearly states it has only 1mg Manganese (as Manganese Ascorbate) per serving and serving size is 3 capsules. Also stated is that the 1mg is 50% of daily requirement. So at 10 mg per capsule a 3 capsule serving would be 30mg! That would be 15x the recommended daily requirement and yes, overdosing! Possibly something may be wrong with the label? Or the supplement? Either way, it would be ideal to contact the seller and Nutramax Laboratories and question/report it. I've been buying this product and other's manufactured by Nutramax Laboratories for years for myself and patients and have never had a problem. Last thing to check is units. Make sure they are not using micrograms vs mg units before reporting. Some companies will utilize different units when changing labeling. Hope I was helpful. Good luck!

Why the dyes? Not sure what you are talking about. All I can say is that it helps my knees.

Could you please tell me the expiration date if I buy it now? Feb. 2017 received about 2 weeks ago. Never had a problem with this either.

can I open the capsules to dissolve in water? I don't know... I swallow the capsules without a problem... this is best arthritis relief that I have found. I wish you well.

What is the expiration date please I have a bottle that I am currently using and the expiration date is February, 2017. There are 210 capsules, and I will be through this and several other bottles WAY before this date.

How long will 210 capsules last? 1 month? 2 months? 90 days? We take two each morning. So you could expect about 100 days. They work very good

Is the gelatin from porcine sources? No idea.

How big are Cosamin DS capsules? How big are the capsules/tablets? I am a 78 year old woman who has had trouble swallowing other products. I use the Cosamin DS because they slide down easily. I haven't tried opening them.

Does it contain seafood/shells? Could anyone please tell me if the item contains any seafood product? Ingredients: Glucosamine Hydrochloride (Crab and Shrimp*), Chondroitin Sulfate, Manganese Ascorbate, Gelatin, Water, Magnesium Stearate, Titanium Dioxide, Fd&c Red #3 and Fd&c Blue #1.

AUTOMATIC - CAT LITTER CLEANERS: If there's anyone out there who used Cat Genie vs. We purchased the Cat Genie, after researching various cat self cleaning litter boxes on line, and after owning the littermaid self cleaning box...and when the Cat Genie arrived it was just so HUGE we never even unwrapped it, just sent it right back. It looked like a WASHING MACHINE! That it, assuming we're talking about the same item! We now have the new automatic Littermaid for multiple cats (2). We use it with the Bag-it system (see my Listmania) which means instead of tossing away the outrageously expensive disposable plastic receptacle and lid every day or so you simply toss away a plastic liner, like the smallest size Glad trash bag, or you can even use a grocery store plastic bag. It comes w/ a solid top to replace the flimsy plastic one, which imo holds in the odors etc even better. Together, this is the best system we've had so far, no mess, odor, little fuss, little maintenance at all. Cats use it with no problems or complaints.

How can we stop litter from falling between the box and the receptacle? The receptacle doesn't stay directly in place when attached to the box. The receptacle is supposed to click into the bottom tabs. To bottom has to be free of litter where the receptacle attaches. Then click in the top of receptacle to the box. Hopefully you have the right receptacles. I put a small no shag rug under the whole box for easier cleaning. Hope this helps.

Litter box keeps on running. It's stuck. What can I do? I really loved it and raved about it, but after about 6 months it would constantly get stuck with not being able to lift the soiled litter. I had to stop using it, but I never got around to contacting the company. I moved on to a automatic circular one, and it didn't work either. Moved on to a 3 pan system where one is a sifter type pan, and I sift it manually. I wonder how long yours lasted.

Where can I get plain Advantage? I divide it up to use on my cats and fear the extra ingredient.

I have it on my amazon store.

is it waterproof Yes, within their disclosed 1-month period of coverage by 1 dose. We give our dog an oatmeal shampoo/spray ever 2-3 weeks but do the Advantage only once a month per instructions. It does take a good 1-2 hours to dry after working into her skin at the back of her neck.

Does this product kill ticks also No, it does not. It is highly specific for fleas.

is this advantage? I don't want advantage II. It is Advantage 2.

Will this stain my all-white dogs hair? I don't know about that but it will damage their liver & has also killed pets. I had a small dog who had liver damage from this so I never use toxic things. I use natural flea control; there's lots of choices. Neem shampoo, grapefruit seed extract, essential oils, and more...search online for natural flea treatments. It works and doesn't harm your pet. http://www.epinions.com/review/Bayer_Advantage/pets-review-435D-29271A1C-3A428387-prod2?sb=1;

<https://answers.yahoo.com/question/index?qid=20100529012958AALtu1E>

Do you ship to British Columbia and if so, at what cost? No Sorry

Please CHANGE the description and package picture to reflect that it is Advantage II. I just had to cancel an order, this sucks! This has been corrected. Thank you.

Want for something safe for my 18 year old indoor cat who has never had fleas and flea bites before this as we live in a high elevation. Any advice? the advantage II is a good product.

have used it on my 14month old kitty, and so far have not seen any ticks or fleas. just squeeze the tube on the back of the skull, (move all the fur aside, until you reach it's skin), so kitty cannot lick it.

First time applying and most went on fur (she wouldn't sit still)...will it still work? Yes, it will work. My suggestion for applying it next month, is to get a friend to help you by holding her. (May even need to wrap her in a towel to keep her still) I believe it \"tickles\" as it runs down

their skin under the fur which is why they have problems being still. As you get better at applying it, Bonnie, try giving her a special treat and you might be able to dose her while she is eating - but you have to be fast with this method. The towel works well for me with cleaning ears, giving antibiotics, pills, etc. But someone else holds the towed cat while I \"dose\" it. Hope this helps. Amy"

i have a 5 y/o brother who loves to play with my cat, how long after the application until its safe to handle her again? I'm not the manufacturer of the product, so I can't answer that question with any authority. However, I'd probably wait until the area is dry.

is this greasy Not that I am aware of

what is the difference between Advantage and Advantage 11 for cats? I have no experience with Advantage 1, but do use the 11 on my indoor/outdoor cat, and no fleas...she spends a lot of time out and in my gardens, loves to hide in the bushes. I'll stick with Advantage 11. Hope it works for you too.

Does this product also kill lice? No

hi i was wondering which advantage i should get? i have 3 cats my two males weigh a little over 9lbs and female weighs between 6-7lbs I'd buy the 5-9 for the female and the 9 + for your males if you can afford to buy 2 , other wise do the 5-9 for all.

Is this advantage 1 or 2? Advantage 2

does it work on ticks? Hi The Advantage II for Cats will kill ticks and then repel new ones. Check out Google with your question and it kills tick and fleas. I feel it is a.. real benefit for cats and I have used it for years. Thanks, Gary Frost

Do you ship to British Columbia and if so, at what cost? No Sorry

Please CHANGE the description and package picture to reflect that it is Advantage II. I just had to cancel an order, this sucks! This has been corrected. Thank you.

will this work for dogs It even works for infants.

Is there any cover for the initial open dish, or is it always open? Always open, so you can \load\" 5 meals into it."

Is it weather resistant? Can you use this bad boy for outdoor feeding? Will rain totally fry the George Jetson Advance Mechanism? I don't think it can be used outdoor. The rain will absolutely fry mechanism and also get in around the rim to wet the food.

Can a recent purchaser confirm this includes ice packs for freshness of wet food? Thanks.

Yes, I ordered mine about 2 months ago. It has a lower tray with 2 removable pieces (1/2 circle-shaped) you can fill with water and freeze.

Can I replace the timer I would imagine that you could if you could find a replacement. The timer in the center does come out and then snaps into place.

Has anyone tried using this product with a dog? I need a device to give my 22 lb. terrier a pill when I'm not at home. Yes I use it for my 14 lb Jack Russell. It's very easy to operate & easy to clean out. No complaints

Filling Automatic Cat Feeder: Do you remove the whole top and fill all slots at once, or use advance button and fill one at a time? Faster to pop the top off and fill all the compartments at the same time but you can advance one compartment at a time and do it that way too.

Will my cats paw or head get caught when the device moves to the next dish and she is still trying to get food out of the previous dish? I don't know, but it has never happened with my cats.

How do you set the timer? I set it by setting the hrs u want to feed , then turn it on at the time you want feed example 7 pm if you have it set for 12 hours it will open again at 7 am We thought we had it put together correctly, until we turned it on. It keeps on spinning & spinning. Our finger doesn't stop it! Advice? I tried to get mine to spin to figure out the problem. Even with the center piece not pushed down, it will only advance the amount of one feed. I think you may have received a defective unit. I have never had that problem and could not create it.

Does it fold to fit into the back seat while your pet rides in the back of the Outback or similar car? Thanks! It does fold in half easily and would fit in the back of my car or on the back seats. I LOVE this ramp! We have left it out on our deck steps since we purchased it months ago and easily stands up to snow and ice. I was even thinking of getting another to leave in my car, no need to for now. If you do buy it, train your dog on it inside on a flat surface blocking any other passage and be at the other side of it with your dog's favorite treat! It works like a charm rather quickly, as someone else first suggested in a prior review.

Can I use it at the passenger's side door on an SUV (Pilot)? If the door opens wide and you have at least a 17 inch door sill you should be ok.

Above Says: \"With its 500-lb capacity, it's sturdy enough for humans\". True? Can I use as a boarding ramp for an old houseboat?\" This is a very sturdy ramp. I think a boarding ramp for an old house boat would work provided it is set and leveled properly. I'm surprised this is sold as dog ramp it's heavy bulky too much to take in and out of car I used it only a few times. Good luck

In winter, sometimes the street and car bumper are iced over. Angling and rubber helps, but is there any kind of safety latch as added protection? I believe that there is some sort of strap that one can purchase separately which can be attached to something in the vehicle to keep the ramp from moving around and/or slipping. I am not personally familiar with the item.

We have a Great Dane puppy who is likely to weigh 80kg (175lb) will this take her weight when fully grown? PetStep says that it will take up to 500 pounds. Our dog was 85 pounds and there was no flex in the ramp. I think that it would do well for your pup even when she is full grown. Petstep has a good video on their website that you might want to look at.

how does the ramp stay steady and not slip on back of vehicle? it has \"live\" rubber on the top, which makes it basically very difficult to slip off. i've never had a problem with it."

I see this ramp listed as 22 pounds as PetStep and then 18.5 pounds as Petstep II. Are these the same or different? 22 lbs is the shipping weight including the box and all packing materials to keep the product safe during transit. 18.5 lbs is the weight of the ramp by itself without any packaging.

Can this be used on a sofa. My very old Westie is having trouble with the incline on a shorter ramp? For sure.. but when unfolded the ramp is long so check the measurements to make sure you have the floor space.

Would this ramp be usable on outside wood deck steps (about 6 steps)? Can it withstand the elements like rain, cold and snow? Thanks!! Hi, it will go up five steps. I think your dog should be ok doing the other step. I use mine to get up the xtra cab of my pickup. I built a dog platform

back there. It was too steep to go right to platform, so I hook it up to the door sill and he does the step up to the bed. Only thing is the ramp seems a little steep when I hooked it to my outdoor deck stairs. I think you will be ok, but you might have to guide your dog everytime. It will definitely be good outdoors. Some people use it as pool stairs

How high is the ramp? The product information (click on product link on left) says it's 70" x 17". However, obviously, you need to allow for the loss of height when angling the ramp towards your car. Measure the height of the back of your car first, so you can calculate the angle and see if the 70" length will be long enough."

I am wanting to make sure I get the T-Rex. Is there any way I can guarantee the T-Rex? Our dog can't chew the other dino's but the T-Rex is perfect Hello, The only way you can make sure to get a t-rex is to call us and place the order. Or if you go thru Amazon you need to call us after you place the order so we can mark your order for the t-rex. Let me know if I can help you with anything else.

How big is it? I have an 11 lb, 1 yr old Mini Poodle who destroys soft or stitched together toy. She loves real chew toys It's about 6" long and 1 1/2" wide. Not too big but it has lasted with my 80 lb lab"

is this product of USA Yes. They are made in the USA

There seem to be really good and really bad results with this bone, my dog is 28 lbs and a moderate chewer, is this right for her? Thanks! My dog is about the same weight and I would call her a very aggressive chewer. This is by far her favorite chew toy and it has lasted way longer than I ever expected. It is chewed up pretty well, but she still loves it and it looks to last for a good while yet. You might want to give it a try. Good luck!

Are the blue dinosaurs still available. The blue ones are more flexible than the white ones The white ones are too hard for my dog. We only carry the white ones.

I have a shih tzu dog about 6 LB. is it safe for her? I would recommend checking the manufacturer's recommendations. My dog is close to 30 lbs., so it is hard to know. I am not sure what about it would be dangerous for her, however.

how much does it weigh I can't find the stegosaurus right now but I would say from .25-.50 lbs. My pit mix is only 7 months old and 38 lbs himself. They've been really reliable.

Will this work for a 11 lb cat that loves to gnaw on things? He has destroyed countless cat-sized chew toys.. Wow - that's a big cat. It might work, depends on how strong the cat is. This chew is not flexible at all, it is a solid piece. My lab/greyhound mix loves it but she's a dog and not a cat. It's not that expensive, might be worth a try. If your cat doesn't like it, I'm sure your local animal shelter will make good use of it -)

Why is this plastic so hard? I just received it today, and it is ridiculously hard. I think this is bad for small dog's teeth. They could break Not sure. I have read other negative comments from small dog owners. I have three rotties ranging in size from 70-140lbs. They adore their dinosaurs. I do keep an eye on them after reading others problems. I throw them out when they get too small. Perhaps Nylabone should indicate they are for larger dogs. If you aren't happy return them. I have been buying these dinosaurs for 5yrs. They usually last about a year with my guys. I have yet to find anything else that lasts more than 10min. So I'm thrilled to have found a toy that all three love, and it's super cost effective. Also, their teeth and gums look good for adult dogs. One is 4yrs old and two are 7yrs old. I'm not able to brush their teeth, easier to wrestle a greased pig, so this is a good option for keeping their gums healthy.

I would like to place an order for three, but want three DIFFERENT dinos - how do I go about this Unfortunately, these come in assorted shapes and you are not able to pick the one to be shipped.

Is this Joint & Immunity support as pictured, or just Joint Support as you have it titled?

It is Joint and Immunity

HI, would this be recommended for a large breed puppy to promote healthy joints and over-all health? If not is there another Nupro product suggested? It's worked very well for our dogs ranging in age 5-12 years and 20-90lbs. Our oldest has actually started to walk on her own all the time now!

Where is this product made? Farmingdale, New Jersey..NUPRO All Natural Dog Supplement is formulated as a powder, and is not a concentrate, which allows it to be easily assimilated into your dog's system and digested with your dog's food. There is no sense in giving an animal this superior product if they do not digest it properly. Whether you use commercial dog foods, home-cook for your animals, or feed the B.A.R.F. diets, NUPRO All Natural Dog Supplements should be a fundamental part of your pet's daily nutritional program. If you would like more information or a Taste Sample of Nupro \Gold\" please call 1-800-360-3300 Question: Is there an Expiration Date on the container? Answer: Yes. Each container has a Lot Code sticker located next to the bar code near the label seam. The last 6 digits of the Lot Code# is the Date of Expiration. For example: Lot Code# R1 031815 = Date of Expiration is March 18, 2015. Keep in mind, the potency of nutrients do begin to gradually deplete over time and although the product will still be safe, your pet may not receive the full benefit of the nutrients after the date of expiration."

This caused a horrible rash and itching for my dog. Anyone else experience this? Yes. My dog has a systemic yeast infection that got really bad this summer. Malassezia on the outside, candida on the inside. Most carbs cause him to blow up so he's on a millet/lamb diet and I'm looking for essentially a \leaky gut\" supplement for dogs. Bought the 5 pound jug and within a week he was inflamed with massive lymph node swelling. Not sure if it's the yeast cultures (supposedly inactive), or the MSM, or since it's \"pet grade\" whatever else slips in. With all the great reviews I really had my hopes up. :("

Can you please possibly advise on the expiration date? I think the one I had had an exp of 2/2018 so it gives you time to be able to use it. I have 2 homes that my dogs goes between, so I divided it and put it in my own container.

how much do you give a 15 pound dog during the first three months of using the product you would give a 15 pound dog a half a scoop (the scoop is included in the jug). After 3 months of daily use you can cut this back to a quarter of a scoop daily. Hope that helps. This really is great stuff

I received my Nutri-Pet Research Nupro Joint (5-Pound) today and opened the lid and it didn't have a seal. Do they seal them? I have ordered this product many times and it has always been sealed. I would contact the seller and ask to have a new one sent to you. I would also ask for a prepaid label if they want yours back. This supplement must be sealed to be fresh and effective.

Can you use this for cats? Yes

what is the difference between the original and the silver and the gold The silver is more for joint lub.

I know it's made in the USA, does anyone know where the ingredients are sourced from?

I don't know the answer to that. I continue to use Nupro for my 2 dogs and feel very good about it. My retriever/Chow mix is 15 years old and has been on it for the last 10 years. My Aussie is also on it.

Is the Duckworth made in the USA? Well jag101 I just happen to have a tag from my last Webster Duckworth and I will copy for you exactly what it says. Distributed by: Multipet International, Inc., Moonachie, New Jersey. A Division of The Multi Group www.multipet.com. Made in China. I hope this helps you. I stand by my review. All the best!

Will washing affect the squeaker? I've only washed it once, and no, the squeaker was not affected.

Is it big enough for a large dog? Very cute toy but my mini schnauzer eventually ripped it apart. Great toy for a dog that isn't too destructive.

Where is this duck made It was made in China.

can it be machine wash? Yes. No issues.. Minus my dog missed his smell on it..

does it quack No, it just squeaks, but our Golden goes crazy making it do that. He got it at Christmas and it still works.

This is the toy that they have on the movie called Click by Adam Sandler? Right? Nope
My 75 lb shepherd cross adored his Duckworth but I wonder how it works with smaller dogs - 30-40 lbs when grown. The large Duckworth was my 14 year old Chihuahua's first toy. He is now on his 3rd one. It's the only toy he will play with. We have 10 chi's and a bucket full of toys and he only plays with the duck.

How do I add a photo to my review? When you start typing to add your review, the box you are typing in will expand and you will see below it a new box for the Headline for your Review. Just below that, at the right end of the box, you will see two buttons you can click. One says Add a Photo and the other says Submit. -- Hope this helps! :)

does someone have a picture of the label ingredients. I like to see the percentages after dehydration of the ingredients We do not have a picture of the product label. Please view the ingredients below: Flavor: Beef & Rice Guaranteed Analysis: Crude Protein (min.): 25.0% Crude Fat (min.): 15.0% Crude Fiber (max.): 4.0% Moisture (max.): 10.0% Zinc (min): 150 mg/kg Selenium (min): 0.3 mg/kg Vitamin E (min): 150 IU/kg Omega 6 Fatty Acid* (min): 2.4% Omega 3 Fatty Acid (min): 0.4% Total Live and Active Cultures* (min): 2,200,000 CFU/kg Calorie Content: 3,600 kcal/kg 337 kcal/cup * Not recognized as an essential nutrient by the AAFCO Dog Food Nutrient Profile. Ingredients: Beef meal, peas, cracked pearled barley, ground rice, rice bran, chicken fat (preserved with mixed tocopherols), fish meal, pea protein, dried beet pulp, egg product, natural flavor, flaxseed, potassium chloride, salt, choline chloride, dried chicory root, kale, chia seed, pumpkin, blueberries, oranges, quinoa, dried kelp, coconut, spinach, carrots, papaya, yucca schidigera extract, Lactobacillus acidophilus, Bifidobacterium lactis, Lactobacillus reuteri, vitamin E supplement, beta carotene, iron proteinate, zinc proteinate, copper proteinate, ferrous sulfate, zinc sulfate, copper sulfate, potassium iodide, thiamine mononitrate, manganese proteinate, manganous oxide, ascorbic acid, vitamin A supplement, biotin, niacin, calcium pantothenate, manganese sulfate, sodium selenite, pyridoxine hydrochloride (vitamin B6), vitamin B12 supplement, riboflavin, vitamin D supplement, folic acid.

What is the percentage of protein and fat? Thank you Estimated Dry Matter Nutrient Content That is 28% protein and 17% fat Protein010028 Fat010017 Carbs010048 Ingredients: Lamb, lamb meal, cracked pearled barley, ground rice, egg product, chicken fat (preserved with mixed tocopherols), millet, dried plain beet pulp, potatoes, flaxseed, natural flavor, fish meal, potassium chloride, salt, choline chloride, dried chicory root, L-Carnitine, Yucca schidigera extract, vitamin E supplement, iron proteinate, zinc proteinate, copper proteinate, ferrous sulfate, zinc sulfate, copper sulfate, potassium iodide, thiamine mononitrate, manganese proteinate, manganous oxide, ascorbic acid, vitamin A supplement, biotin, niacin, calcium pantothenate, manganese sulfate, sodium selenite, pyridoxine hydrochloride (vitamin B6), vitamin B12 supplement, riboflavin, vitamin D supplement, folic acid Fiber (estimated dry matter content) = 3.3%

does it have grains? does it have wheat? Well since rice is a grain I would say yes, it contains grain. Wheat I'm not sure but go to the website, diamondpet.com and it will give you ingredient lists. They also have a grain free version but its a little more expensive. Good luck!

Anyone use this with a dog that needs 4 cups a day? About how long does the bag last? We are going to be traveling and want to assure I have enough. I feed two dogs with it medium size lasts about a month

Is it common to switch between the beef, chicken, and lamb products? Or should I just stick to the one he already enjoys? I switched my dog from Diamond Chicken to Lamb and he was fine. I mixed the end of the bag with some of the fresh and gradually added more of the new.

Is this dog food made in the U.S.A? I have 3 Poodles. Is the nutrient content good? Yes. It is made in the USA. They have a website. Google them. Awesome food! I have an American bulldog who has food sensitivity and is doing great on it. I have used the beef and also chicken and rice. Got a puppy in February and s h e loves it too. Very happy with this product!

Does the bag of dog food ship in a big box or a separate bag, or does it just come with a label attached to it? Thanks! Ships in a big box stuffed with paper for support. I have never had any issues with the bag being damaged. I order monthly.

How much does it say to feed a 42 pound dog? 40-60 pound gets 2 1/2 - 3 1/4 cups.

i can't remember what kind i bought from the store but want to buy it here since it is cheaper...does the food look like whole wheat? round and brown Yes

Does it stop shedding? It improves coat quality , as for shedding I own a borzoi , japanese chin & a great dane . nothing stops shedding so I own a few vacuums .they shed per seasonal change . I also have started grooming at age 16 I am now 51 . have not yet found the magic powder, shampoo or brush to stop the sheds . good luck .I do love nupro very good for the dogs health .

Where is it manufactured? It is made in America. I called their 800 number and asked just to be sure.

I'm trying to figure out how long this would last with our pack, what's the scoop size in grams or ounces? Since I already provide a fairly complete diet, I supplement my pack of 4 (each in the 40-70 lb range) the daily maintenance dose, which is 3/4 oz. At that rate, 5 lbs yields about a little over 100 servings. According to their website, www.nuprosupplements.com, the ** Enclosed scoop = 3 tablespoons (1 oz.) **. I recommend going to their website for accurate information or call the 800 number on the label: 800-360-3300

how many servings would there be in 5 pounds for a 90 pound dog? A 90lb dog would get 2 scoops a day for the first 2 months. And 1 scoop per day thereafter. That is the recommended dosage on the tub. It is hard to say exactly how many scoops there are per tub but the scoop is small. I am estimating 6+ months. I am 1 month in a new tub and barely put a dent in it. However I only do 1 scoop per day, all the time, as maintenance. Its a lot and should last a while. Hope that helps.

Do you still need to add fish oil or are there sufficient Omega-3's in the Nupro? I don't add any. My Great Pyrenees seem to do well on recommended servings
